

New Mix Waterbury Mobility Equity Survey Analysis

**31% indicated someone in
their household has a disability**

**30% indicated no one in their
household owns a vehicle**

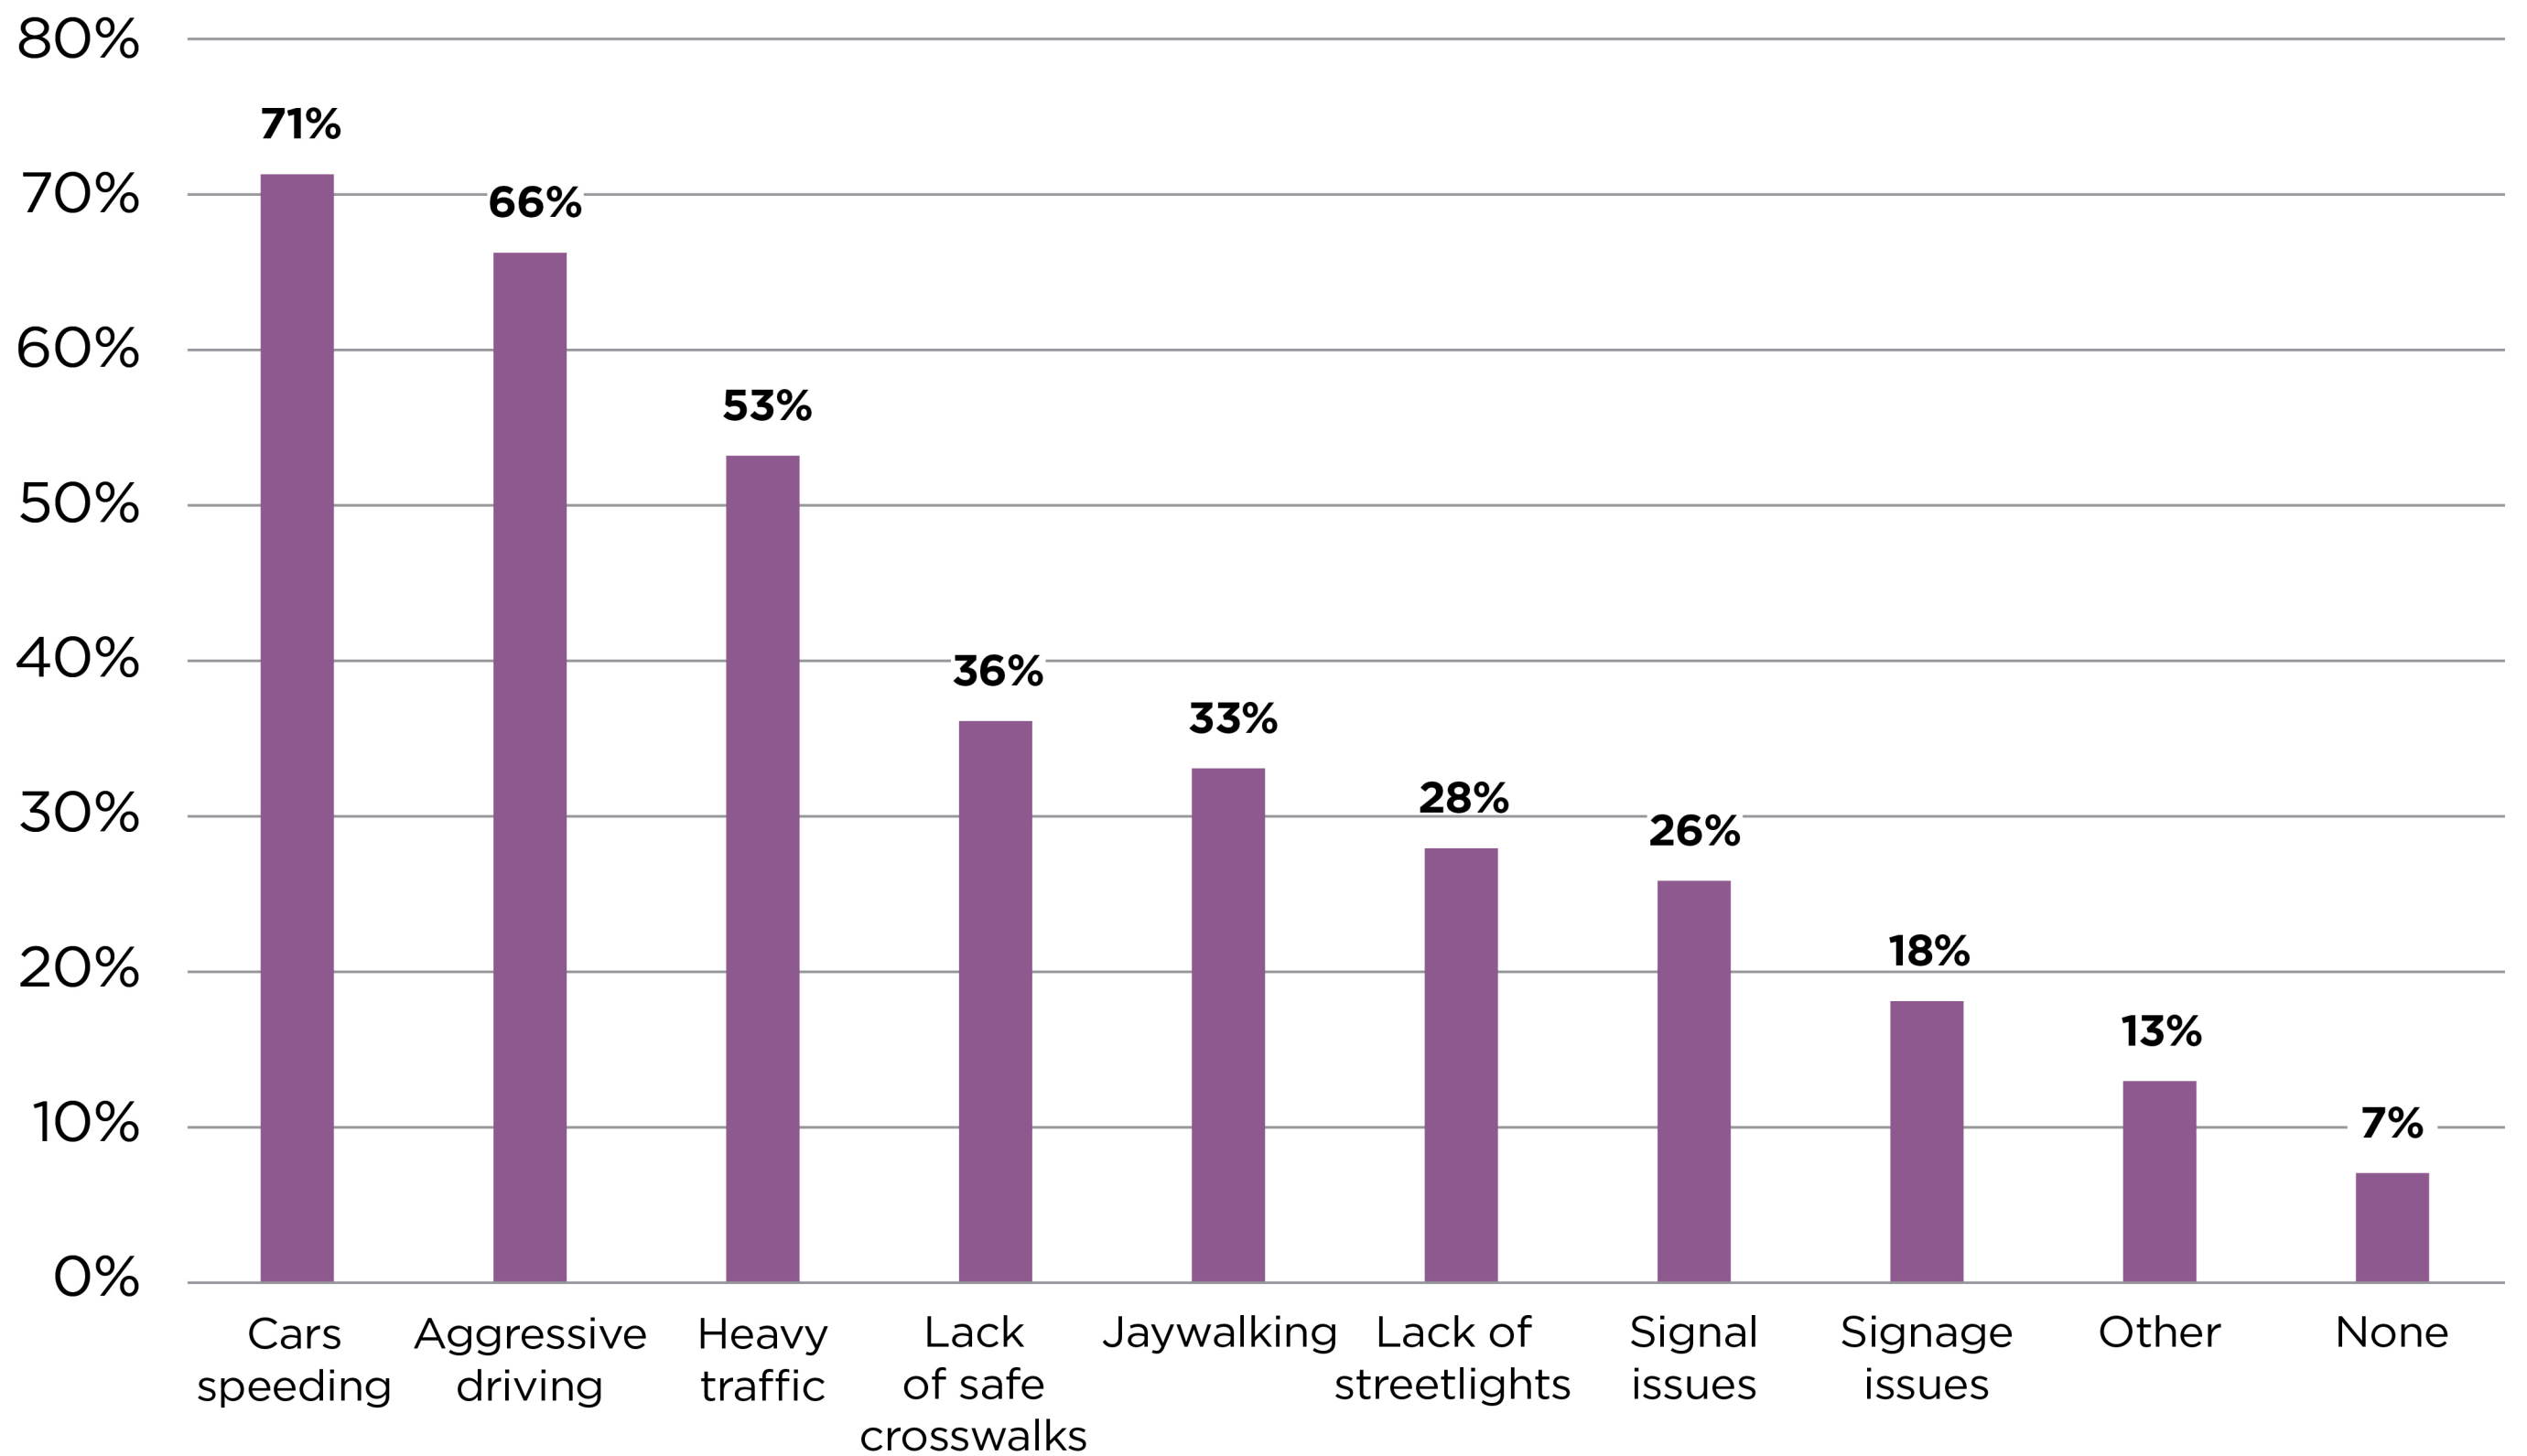

**23% feel there are destinations
that are currently unreachable**

The New Mix Mobility Equity Analysis collected data on Waterbury residents' and commuters' experiences with safe, convenient, and accessible pedestrian and bicycle routes, as well as public transit options. The results from this survey will be used to form recommendations for early action, near- and long-term improvement projects for the Mixmaster and local roadway networks.
